Trello

PROJECT EXPERIENCE

ChatGPT Clone

- Implemented a ChatGPT clone using React and OpenAI Models.
- Integrated OpenAI API models into a React application to simulate ChatGPT-like conversational experiences.

Database Query Generator using React and OpenAI

- Developed an application using React and OpenAI to generate database queries.
- Designed a user-friendly interface where users can select the database and input their query, which is then processed and generated by the application.

Linkedin Clone (02/2023 - 03/2023)

- Worked on a Full Stack Linkedin Clone project using React and Firebase.
- Collaborated with a team to build a replica of the Linkedin platform, implementing functionalities using React and Firebase technologies.
- <https://linkedin-clone-a077e.web.app>

Firefly.js (05/2023 - Present)

- Developed a custom tech stack utilizing Next.js and Typescript for the frontend development.
- Leveraged Firebase for efficient backend implementation.
- Implemented TRPC for streamlined API Routes and Procedures.
- Utilized SASS for styling the application, ensuring a visually appealing user interface.
- Integrated NextAuth for seamless authentication functionalities.
