Chrome Dev Tools   Postman   NPM

API Design and Development   TRPC

PERSONAL PROJECTS

Evernote Clone
- A simple Evernote clone built using Next JS and Firebase, where we can save our notes.

GoodNews
- An android news application built using React Native and Native Base that fetches news from different sources and organizes them in categories like Health, Business, Sports, and All.

ChatGPT Clone using React and OpenAI Models
- A way to create a clone of ChatGPT using models from OpenAI API and integrate them in React

Database Query Generator using React and OpenAI
- An application that we can use to generate database queries. Just select the database and type the query.

Linkedin Clone using React and Firebase (02/2023 - 03/2023)
- A Full Stack Linkedin Clone built using React and Firebase
- https://linkedin-clone-a077e.web.app

Firefly.js (05/2023 - Present)
- My own tech stack that is built upon Next.js with technologies like Next.js and Typescript for the Front-end, Firebase for Back-End, TRPC for API Routes and Procedures, SASS for styling, and NextAuth for authentication
- https://github.com/nishant-666/Firefly.js

ORGANIZATIONS

Youtube (06/2021 - Present)
Programming Content Creator

freeCodeCamp (02/2020 - Present)
Contributer
